

# Systemwide Careers

At Systemwide we offer graduates unparalleled opportunities to work directly with clients on complex and challenging assignments in the rail industry.

## Working with Systemwide

As a Systemwide graduate you will gain experience in a wide range of rail projects throughout Australia. These may include creating a strategic plan for metro operations in the suburbs of Melbourne or recommending infrastructure changes to support coal operations in far North Queensland.

As a small, specialist consulting firm we also provide graduates with the opportunity to work directly with clients and manage projects early in your career.

At Systemwide you will work with people from a variety of backgrounds such as engineering, science and rail operations management. We believe a diversity of skills and experience delivers greater insight and improves the outcomes for our clients.

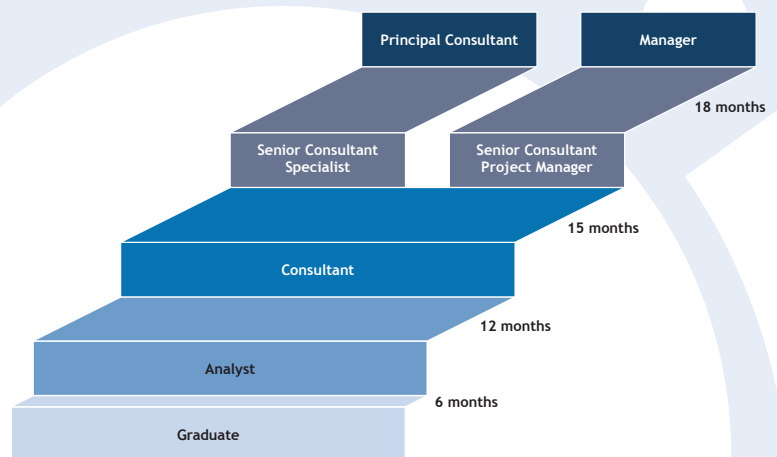

## Professional Development

At Systemwide we have a professional development framework to guide our graduates and consultants through their career. We provide the opportunity for accelerated progression towards one of two main streams:

- Specialist (technical expert)
- Project Management.

However, all graduates start in the same stream and there is also opportunity to share skills and training between streams.

At each stage of your career, we will complement on the job training with formal and structured learning programs. We also believe in continuing education and support our staff in pursuing further academic and industry-based studies.

## Graduate Recruitment

We are currently looking for high calibre graduates to join our team. We are interested in graduates from a variety of fields such as:

- Engineering (mechanical, electrical, civil etc.)
- Mathematics
- Operations Research
- Information Systems.

Our graduates are analytical thinkers, pay attention to detail, communicate well, can present complex information simply and have a team-based attitude to success.

If you would like to kick start your consulting career with Systemwide send a covering letter, resume and academic transcripts to: [graduate@systemwide.com.au](mailto:graduate@systemwide.com.au)
